Dear Quintin,

EFW and Composting Waste Management Facilities: EIA confirmation of scope

Further to this morning's meeting, I would like to confirm that I am happy with the scope of the Environmental Impact Assessments identified for both the Energy from Waste facility and the composting facilities as developed to date. Clearly, final site selection for both facilities is dependent not just on environmental issues and will be an important determinant in the final emphasis of each of the elements that need to be presented in the final Environmental Statements.

Whilst it is important to recognise that the Planning and Environment Department operates in a regulatory role for the EIA process, the flexible and co-operative approach that we have engaged in so far has been very productive in enabling the scope to evolve as the process develops and other factors are considered. I look forward to continuing in this manner as the project develops further.

Yours sincerely,

Sarah Le Claire
 Policy Manager
